

TORO

Count on it.

WARNING

PERFECT FIT DOES NOT MEAN PERFECT PERFORMANCE

*COMPETITIVE BEARING (B)
AFTER 200 HOURS OF USE*

While all bearings may look virtually the same on the outside, it's the unseen configuration on the inside that gives Toro bearings the edge over competitive parts. Our unique seal and grease configuration is proof that similar looks do not indicate similar performance.

TORO BEARINGS WERE FOUND TO RUN UP TO 30% QUIETER AND LAST UP TO 70% LONGER than competitive models in an independent lab study. This innovative seal and grease configuration withstands higher load capacities and speed than will-fitters, giving you higher quality, greater tolerances and better performance.

Just one more reason to Keep it Toro.
